

## Seeking Caregiver Participants for an Active Gaming Research Study

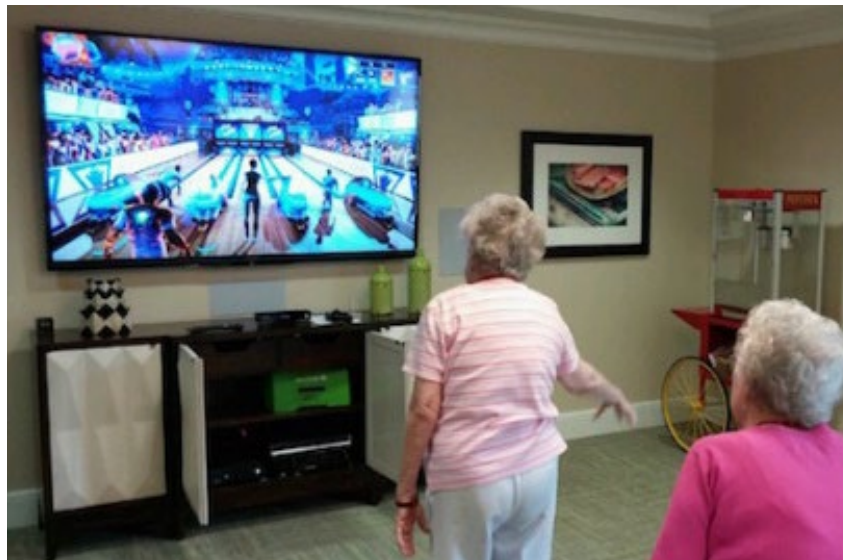

**Principal Investigator:** Dr. Arlene Astell, PhD

Are you a *caregiver* of a person or people with **dementia or mild cognitive impairment (MCI)**?

If yes, you are invited to take part in a **research study** looking to develop and test an active video game for people with dementia or MCI. This phase of the study will focus on getting your input on the first design of an active video game we are making for people with dementia or MCI.

### Participants will:

- Complete a demographic survey
- Be video recorded during a 30-minute one-to-one interview about your input on the active video game

Your decision to participate in the study will not affect your usual activities.

For more details, **please contact** Erica Dove (Study Coordinator) at 416-597-3422 ext. 7842 or [erica.dove@uhn.ca](mailto:erica.dove@uhn.ca).

Please note that communication via email is not absolutely secure. Please do not communicate personal sensitive information via email. This study has been reviewed and approved by the Research Ethics Boards at the University of Toronto and the University Health Network.

**MBT Co-Design Study:** Ph1 Recruitment Flyer for Caregivers [no paper strips] (v3; July 8, 2022)
